## Your sustainable future starts now

The Paris Agreement and other climate initiatives have made achieving sustainability a pressing challenge for today's businesses. Your customers expect it. Your partners demand it. The planet is counting on it. Now you can meet that challenge head on and thrive, together with Deloitte Digital + Salesforce.

We can help you embed sustainability into your operations, transition to a low-carbon economy, enable safe and secure supplier management, and meet disclosure and regulatory requirements – all while navigating increasing pressures from investors, governments, consumers, and internal stakeholders. Launch your sustainability journey today with our range of quick start packages, based on advanced Salesforce technology, tailored to your needs and ready to scale. We'll be right there with you at every stage, helping you transform your organization and grow.

After all, we're in this together, which is why we'll succeed together. With Deloitte Digital + Salesforce on your side, the power to do good is in your hands.

# Get started today with customizable Salesforce assets

## Cloud4M

### Accelerated CRM solution

Build a single, unified view of your customers and connected products, support your end-to-end customer engagement process, and monitor key sustainability metrics with Cloud4M, a Salesforce multi-cloud accelerator and CRM solution.

Track critical data, from sales and service KPIs to carbon emissions, energy consumption and downstream transportation, with pre-built dashboards and Net Zero Cloud. Embed sustainability across your processes. Optimize your existing business model to drive new opportunities.

## Go Zero Now

### Advanced user engagement solution

Drive corporate social responsibility strategy and metrics with Go Zero Now all-in-one user engagement solution. A digital platform based on familiar Salesforce technology, paired with a dedicated Deloitte facilitation team, enables community animation through training, content creation, challenges and gamification.

Adapt a personalized cockpit to priority metrics such as energy consumption, emissions and social data. Receive notifications when objectives are achieved. Manage your call to action process internally. Reconfigure goals as your team progresses.
