

Importance of the Cloud API Vault?

The API Vault cultivates the API-first thinking in the organization. It enables digital transformation and exposes digital assets and APIs by centralizing them into a single unified platform. The Cloud API Vault simplifies exploring the integration capabilities across various iPaaS platforms.

When to use?

- Use as a tool to cultivate API-first thinking in the organization
- Business and technology users across the organization can collaborate, learn, and use the APIs promoting reusability

What are the benefits?

- Reduces API integration development by 30-40%
- Provides top-down view of API during design workshops
- Drives more differentiated selling vs our competitors within the Application pursuits
- Increases consistent delivery approach for our largest and most complex integration projects

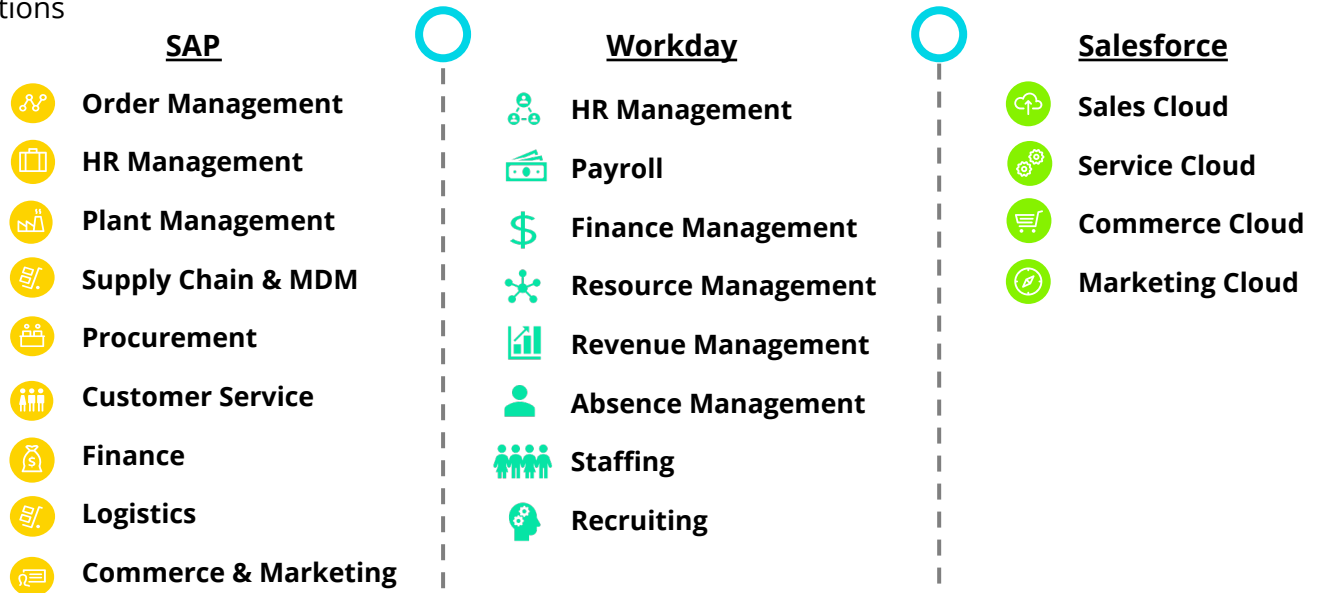

Business area

The Cloud API Vault currently holds 100+ APIs implemented across different business areas in different technology applications

What is Cloud API Vault?

The Cloud API Vault is a library of integration assets created by Deloitte's Cloud API and Integration Practice based on our best practices and enable you to meet Delivery Excellence criteria for your project. It is designed to be used as an accelerator to the Design For Re-Use stage of our development methodology as part of a larger project implementation.

The APIs are fully working sample applications, built from Deloitte's vast delivery experience on various integration technology and iPaaS tools. These pre-built APIs address common integration use cases faced by our clients and enable rapid prototyping leveraging common integration patterns and API development standards and best practices.

Available in Multiple Platforms

MuleSoft | Boomi | Azure | Apigee | SnapLogic | AWS | SAP CPI

How Do I Gain Access to the Cloud API Vault?

Required

COMPLETE ACCESS REQUEST FORM

Complete our [Access Request Form](#) and Viewer Level Access will be granted

Need access to our codebase and complementary tools?

Submit a request using the "Request Access" link from the [Cloud API Vault homepage](#)

Optional

CONSUMER LEVEL ACCESS

Provides access to GitHub**, in addition to the Viewer Level Access to the Cloud API Vault

DEV Sandbox Environments (Workday, Salesforce, SAP, etc.)

Code Repository (GitHub)

Collaboration Tools

Cloud API Vault Portal

Optional

CONTRIBUTOR LEVEL ACCESS

Provides access to Sandbox environments and Collaboration Tools, in addition to the Consumer Level Access to the Cloud API Vault

DEV Sandbox Environments (Workday, Salesforce, SAP, etc.)

Code Repository (GitHub)

Collaboration Tools

Cloud API Vault Portal

**Follow [these steps](#) to create a GitHub ID before requesting access to the repository
