

Supplier 360

With Supplier 360, you manage both the relationships and the performance of your suppliers in one place. It scales to fit your organization and allows you to be laser-focused on driving transformation.

Analyze portfolio cost performance with aggregated, reliable and detailed spend data, compare with market benchmarks, and identify target areas for improving cost structures.

FEATURES

Core data model

Collection of related data and knowledge to support a 360° view of your suppliers.

Case management

Increased productivity due to all users, across all business units, fields and districts having the same view of the well.

KPI engine & reporting

Forecasts built on real data and no more error prone spreadsheets. Implement the best plans with the ability to run multiple scenarios in the planning stage.

Work order management

Coordination with suppliers on upcoming, current, and historical jobs.

Performance management

Increased collaboration with a single-view of the well. Everything can be kept in one place, providing a true 360° view of the data.

Supplier portal

External access to data surfaced through the Supplier Hub, and additional functionality.

BENEFITS

Connected data and collaboration tools to resolve promptly flagged issues objectively.

Ensure invoices are paid in compliance with contract terms, to reduce overpayments and contract value leakage.

Executives have real-time consolidated insights into every angle of a supplier relationship.

Improve contract terms through refreshed price structures and improved contract levers.

Ongoing data visibility on your work site to optimize day-to-day performance.

Help to make more transparent decisions across safety, quality, delivery, cost, risk and ESG (Environmental, Social and Governance) KPIs.
