

## Supplier 360 + Supplier Sustainability

Supplier 360, manages supplier relationships and performance in one place. Paired with Supplier Sustainability, an automated, collaborative, customizable platform, it is designed to manage ESG issues in a data-driven way. Our focus is on automating data collection and consolidation, enabling analysis and reporting across the value chain and accelerating the speed of information.

### FEATURES

#### EXTENSIBLE DATA CAPTURE AND REPORTING

Ability to capture and report on additional data elements. Reporting coverage across disclosure requirements, e.g., Human Rights and Working Conditions (HRWC), Responsible Material Sourcing (RMS), and Environmental (ENVI) programs.

#### RESPONSIBLE MATERIAL SOURCING

Scale traceability and transparency to the origin of prioritized raw materials, to enable continuous improvement tracking, conducting outreach, and ensuring responsible sourcing of materials is considered when purchasing key commodities.

#### HUMAN RIGHTS & WORKING CONDITIONS

Monitor social responsibility audits, self-assessment questionnaires and training to track improvements, conduct outreach, and ensure human rights factors are considered when purchasing key commodities. Ability to map and assess Human Rights-related risks for Tier N suppliers

#### TRACK CARBON FOOTPRINT

Track improvement, conduct outreach, and ensure environmental factors are considered when purchasing key commodities. Ability to capture and track carbon footprint for Tier 1 Suppliers

#### SUPPLY CHAIN DATA MANAGEMENT

Virtual or onsite assessments or full scope supplier audits conducted under programs for Human Rights and Social Governance, Environment, Responsible Materials Sourcing, and Mineral Due Diligence

#### SUSTAINABILITY MANAGEMENT

Deep insight into a wide variety of sustainability-focused dimensions for Ford's key suppliers

### BENEFITS
