

# GovConnect™ for Grants & Loans

Agentforce World Tour, Washington, DC

**Deloitte.**  
Digital

## **LOOK TO MAXIMIZE EVERY DOLLAR SPENT AND ELIMINATE WASTEFUL SPENDING OR FRAUD WITH GOVCONNECT™ FOR GRANTS & LOANS**

Built on Salesforce, GovConnect™ for Grants & Loans is a single, centralized entry point and collaboration platform. The platform helps grant and loan customers or government staff facilitate transparency, efficiency, and accountability across the grant and loan lifecycle.

GovConnect™ supports each phase of the lifecycle using a common resource and framework, designed to lower delivery time and cost while accommodating the unique needs of individual agencies and programs.

**Reusable features** that are scalable and flexible for use across multiple programs with automation to drive cost efficiency

**Configurable reports and dashboards** show how funds are being used to enhance spending and surface potential fraud, waste, and abuse

**Centralized tracking and automated workflows** for grant and loan management activities and tasks across the lifecycle increase accountability and efficiency

**Secure self-service Grantee portal** enables recipient communications and compliance reporting to validate spending and program outcomes

## **ACCOUNTABILITY ACROSS THE GRANT & LOAN LIFECYCLE**

### **Program Development**

Each grant program can set up and define key components of their program including background, purpose, eligibility, scoring, application components, etc. This module also supports external communications and marketing of the programs.

### **Application Review & Award**

The review module includes all phases of application review including service area validation, financial, technical, and environmental review. The system facilitates these reviews by providing tools and frameworks to support each review and enable collaboration.

### **Performance Reporting & Compliance**

The reporting and compliance module enables grantees to regularly report to the grantor the status of their project, financial performance (if relevant), and other reporting requirements defined in the entity's legal agreement.

### **Application Intake**

External entities check eligibility and apply for funding. The application process includes entry of project details, geographic information, a financial proforma, a capital investment workbook, construction plans, environmental details, certifications, etc.

### **Funds Distribution & Budget Monitoring**

The funds distribution module facilitates monitoring of the budget categories submitted by the applicant and tracks requests for reimbursement throughout the lifecycle of a project.

### **Closeout & Analytics**

Enables grantor and grantee to verify that all required closeout actions have been completed by both the recipient and the agency. Agency can view dashboards/analyses about funds, projects and grantees.

**“This is the first time our program has been able to deliver a scalable and flexible grant solution since this process was first automated nearly 20 years ago.”**

*Operations Branch Chief for Rural Development Agency*
