Opportunity

Enable yourself to **break-away from Legacy Integration** suites enabling speed & innovation

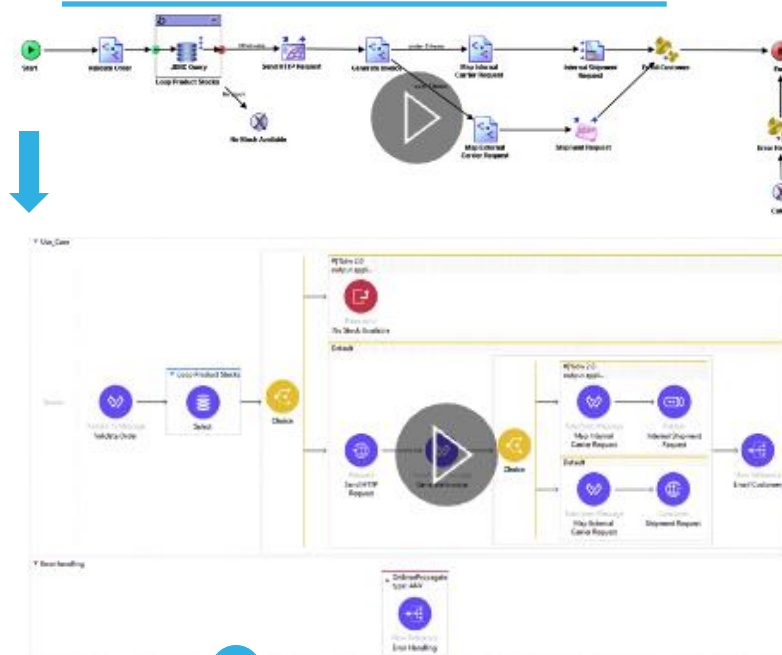

Lower CAPEX of a migration

Reduce risk of a migration

Focus on 20% to refactor and leave the 80% for Lift&Shift

Reduce risk of operating legacy IT

SPIN in Action

 *Translation in Progress...*

Under the Hood

Modular Architecture based in canonical model **enables new input Technologies** onboarding

Ability to **Add-On** your requirements to adapt migration to specific needs

GEN AI Features introduced enabling very complex migration scenarios

More than lift&Shift : **simple refactoring**
of legacy code following best practices.

60%

Automatic Conversion

Effective acceleration in migration process

33%

Saved in Conversion

Reduce overall migration costs per implementation

66%

Reduction Time

Accelerate project timelines significantly

30-40%

Speed Up for Complex Processes

Efficiently manage and convert complex and very complex integrations
