

# Bring Your Own Model (BYOM) & Al with Data Cloud

Super-charge your customer data science capabilities with industry-specific models focused on bolstering acquisition, engagement and growth that connect directly into Salesforce for activation

### FEATURES

## **BYOM Deployment to Einstein Studio**

Fuel Data Cloud's Einstein Studio with your own Al/ML cloud native models, generated on the breadth and depth of your own data sets. Leverage a cloud native ML framework and inferencing solution, with an easy no-code interface, to easily integrate machine learning models into Salesforce.

## **Data Cloud Ingestion Router**

The Data Ingestion Router provides direct access to first party customer data to data scientists in cloud storage or data warehouses without tedious, costly, and error-prone ETL jobs.

### **Deloitte Data Science Model Accelerators**

Industry specific catalog of data science model accelerators to address Marketing & Personalization use-cases across channels, including Digital Engagement, Customer Service and Stores. The business-friendly interface to the models allows an intuitive way to execute against goals such as acquisition, retention, and revenue growth. Automated machine learning pipelines for model development. Model governance for trustworthy Al.

## **AI Driven Flows**

Deploy advanced data science insights across Salesforce and facilitate endto-end flows. Improve process efficiency through better visibility, improved data fidelity by supporting real-time and streaming scenarios and ensuring trustworthy AI while reducing labor overheads through lower training efforts.

## BENEFITS

Reduced technical overhead without adding expensive IT resources usually required to integrate disparate systems Accelerated business outcomes through Al powered predictions of customer behavior and integration in Salesforce end-to-end workflows
